

CMather.com is an established business. We have now decided to spread our wings to Australia so that more people can benefit from the capabilities and services offered by CMather.com (currently, CMather.com is being accessed by over 2 million online users every month who are spread across 112 countries). We are committed to sowing the seeds of success and ploughing them with whole-hearted effort so that our customers can reap the benefits and get the best value for their money.

Here's what we offer:

“A BUSINESS FOCUSED WEB SOLUTION THAT IS COMPLETE, PROFESSIONAL, RELIABLE AND COST-EFFECTIVE”

Domain Management

DOMAIN MANAGEMENT

Our complete web solution starts with the domain name registration service. You can get a .com domain name 'professionally' registered for as little as \$9 per year. Moreover, with every domain name that you register with us, we will provide you a free domain parking page.

If you are looking to shift your web hosting account to us or open a new web hosting account with us, you get an even better bargain i.e. an absolutely free-of-cost domain-transfer or domain-name with a very professional and reliable web hosting service.

Here is a summary of our Domain Name Service:

- Free domain parking.
- Free URL and E-mail forwarding on all domain accounts.
- Free Advanced DNS services
- Choose from over 32 domain extensions. New extensions include .BIZ, .INFO, .UK, .TV and .US
- Discounts when you renew and transfer domains with us.
- Save time by searching and buying multiple domain names.
- Control Panel to view and maintain all your domain names.
- Free 24/7 Support and Free Setup

Web Site Design

WEB SITE DESIGN

Your website is the first sales representative that comes in contact with your potential customers. In fact, your website portrays you to the world 24hrs a day (even while you and your team are asleep). A professionally designed website can go a long way in creating a good impression about you and your company and hence bring more business to you.

A good website is not just about colours and fonts but a lot of other things e.g. the sales copy, SEO, ease of navigation, performance/speed and most importantly reliability.

CMather.com specializes in website design and all the aspects related to it. What we have is rare i.e. a conglomeration of professionals that are experts at each and every aspect of website design and promotion. Super-specialization is what we call it because when it comes to quality, we follow a “No compromises” policy.

Here is what we offer as part of our website design service:

- High performance websites that load up quickly
- A sales copy that prompts the user to act
- Easy website navigation that your website visitors would love
- Fast and reliable customer service that is available all the time
- Custom, optimised graphics that catch attention
- A number of add-on Features, ready to go
- Search engine optimisation so that your potential customers can find you easily
- A selection of pre-configured Web Site Packages to get you started immediately
- Code optimisation to enable easy maintenance and better performance
- Multimedia advertising e.g. banners, creative etc
- Targeted advertising to get serious users/traffic to your website
- Submissions to search engines: so that they present your website in search results.

Web Site Hosting

WEB SITE HOSTING

Web hosting is another important part of a complete web solution. An excellent web design is of no use if it is not backed by an equally competent web hosting solution. A website that is too slow to load or which is characterised by frequent downtimes can scare away potential customers that visit your website. Thus you end up losing potential business. Moreover, your current customers might get a bad impression about the reliability and quality of your services.

We, at CMather.com, are committed to providing a reliable and professional managed web hosting solution (and that too at a very competitive price). We like to invest in our infrastructure and resources in order to ensure best-in-class services to our customers (even if it erodes our profits a little bit). Here is how we achieve the best-in-class service levels:

- High speed data transfer enabled by OC-3 fiber optic backbone (supports speeds of up to 250 MB per second). The visitors to your website would just love it and most importantly take home an excellent impression about you and your business.
- Surplus infrastructure/servers mean higher capacity for handling traffic. Our servers run at half capacity to ensure high speed access to your website. So, when a lot of business is coming your way (or wanting to come your way), our website hosting service will act as a business enabler and ensure that you don't miss out on opportunities due to server overloading.
- Besides speed we provide a high level of security to your website through 128 bit encryption and secure credit card servers. Hence reducing the possibility of people/hackers breaking in and tampering with your website/business.
- No negligible downtime is what we always aim for. This is another reason for maintaining surplus infrastructure.

- Excellent customer support is assured at all times (though you would rarely need it). Our customer support team consists of bright individuals who have great listening skills and are quick in understanding and solving problems.
- **Other features:**
 - Web space of 10,000 MB to cater to all possible needs of a typical business.
 - 250 GB data transfer capacity so that you don't feel constrained/limited anytime.
 - 2500 email ids to ensure that you have sufficient and unique email ids for your team.
 - Unlimited e-mail Forwarding to help you in getting organised in your own way.
 - Support for SSL, CGI-BIN, MySQL and PHP to provide multiple options to you.

... From **just \$12.50 per month**

These features are included in each of our web hosting plans

Website Maintenance

In today's competitive marketplace, dynamism seems to be in the blood of each business. Customers are always looking for improvements in goods and services. In such a competitive environment each business needs to introduce new and improved goods and services every now and then. Moreover, as the business grows, its structure and its needs change too.

This means that the gateway to your business i.e. your website, needs to change too.

Whether you make the changes yourself or delegate the task to cmather.com, you surely need proper controls for your website maintenance. A good control panel (for website maintenance) will save you precious time and money in both the cases. A robust but flexible website structure will provide easy support for changes to your website and will eliminate the need for rebuilding of website. This is where cmather.com comes in. CMather.com offers top class website maintenance service. Here are some of the features of our website maintenance service:

- A website control panel that is easy to understand and use. Hence, saving you both time and money.
- Choice of making the website updates (content only) either yourself or through us. So, we can help you when you are short of time or you can help yourselves using the easy-to-use tools we build for you.
- Various website maintenance packages to suit all needs and budgets.
